

SDE Camp Bootcamp

Day 4(06.02.2022):

Topic: Backtracking

Resource:

6 Introduction to Backtracking - Brute Force Approach

Practice problems:

1. [Combinations](#)
2. [Combination Sum](#)
3. [Combination Sum II](#)

Don't look at the solution while starting the problem. First, understand how you can use the concepts you learned and try on your own. If you are stuck check some hint, even if you can't solve it then check the solution, understand the solution and do it on your own. Don't copy the solution :(

Solutions will be posted here <https://github.com/suresh213/sde-camp-bootcamp> after 6 pm.
